WINDY DAY TIPS

To help keep your yard and community clean on windy days, please follow these tips.

TIP #1 BAG ALL TRASH

Loose trash in your cart will easily blow out if the lid gets lifted.

Bagged trash is less likely to blow out of the cart on a windy day and when it is being emptied.

Bagging your trash also means loose trash will not stick to the bottom of your cart when it is emptied.

TIP #2 DON'T OVERFILL

Overfilling trash and recycling carts means cart lids don't close all the way.

To help ensure lids stay closed and aren't easily lifted by a strong gust of wind, try to put only those items in your cart that fit.

TIP #3 NO PLASTIC BAGS IN RECYCLING

Grocery bags can be recycled at your local grocery store. They can easily blow in the wind if the lid on your cart opens and they are not considered a curbside recycling item.

BONUS TIP Place heavier bags in your trash cart on top of lighter bags.
